FROM: Tony Gallegos, Reclamation Engineer *aa*

RE: Site Inspection, Day Mining Company (Jack Day), Black Jack #1-2 Mine, S/019/044
(UTU- 76412, Grand County, Utah)

Date of Inspection: October 27, 1998
Time of Inspection: 1345 - 1400
Conditions: Overcast, increasing rain
Participants: Sal Venticinque, BLM; Tony Gallegos, DOGM

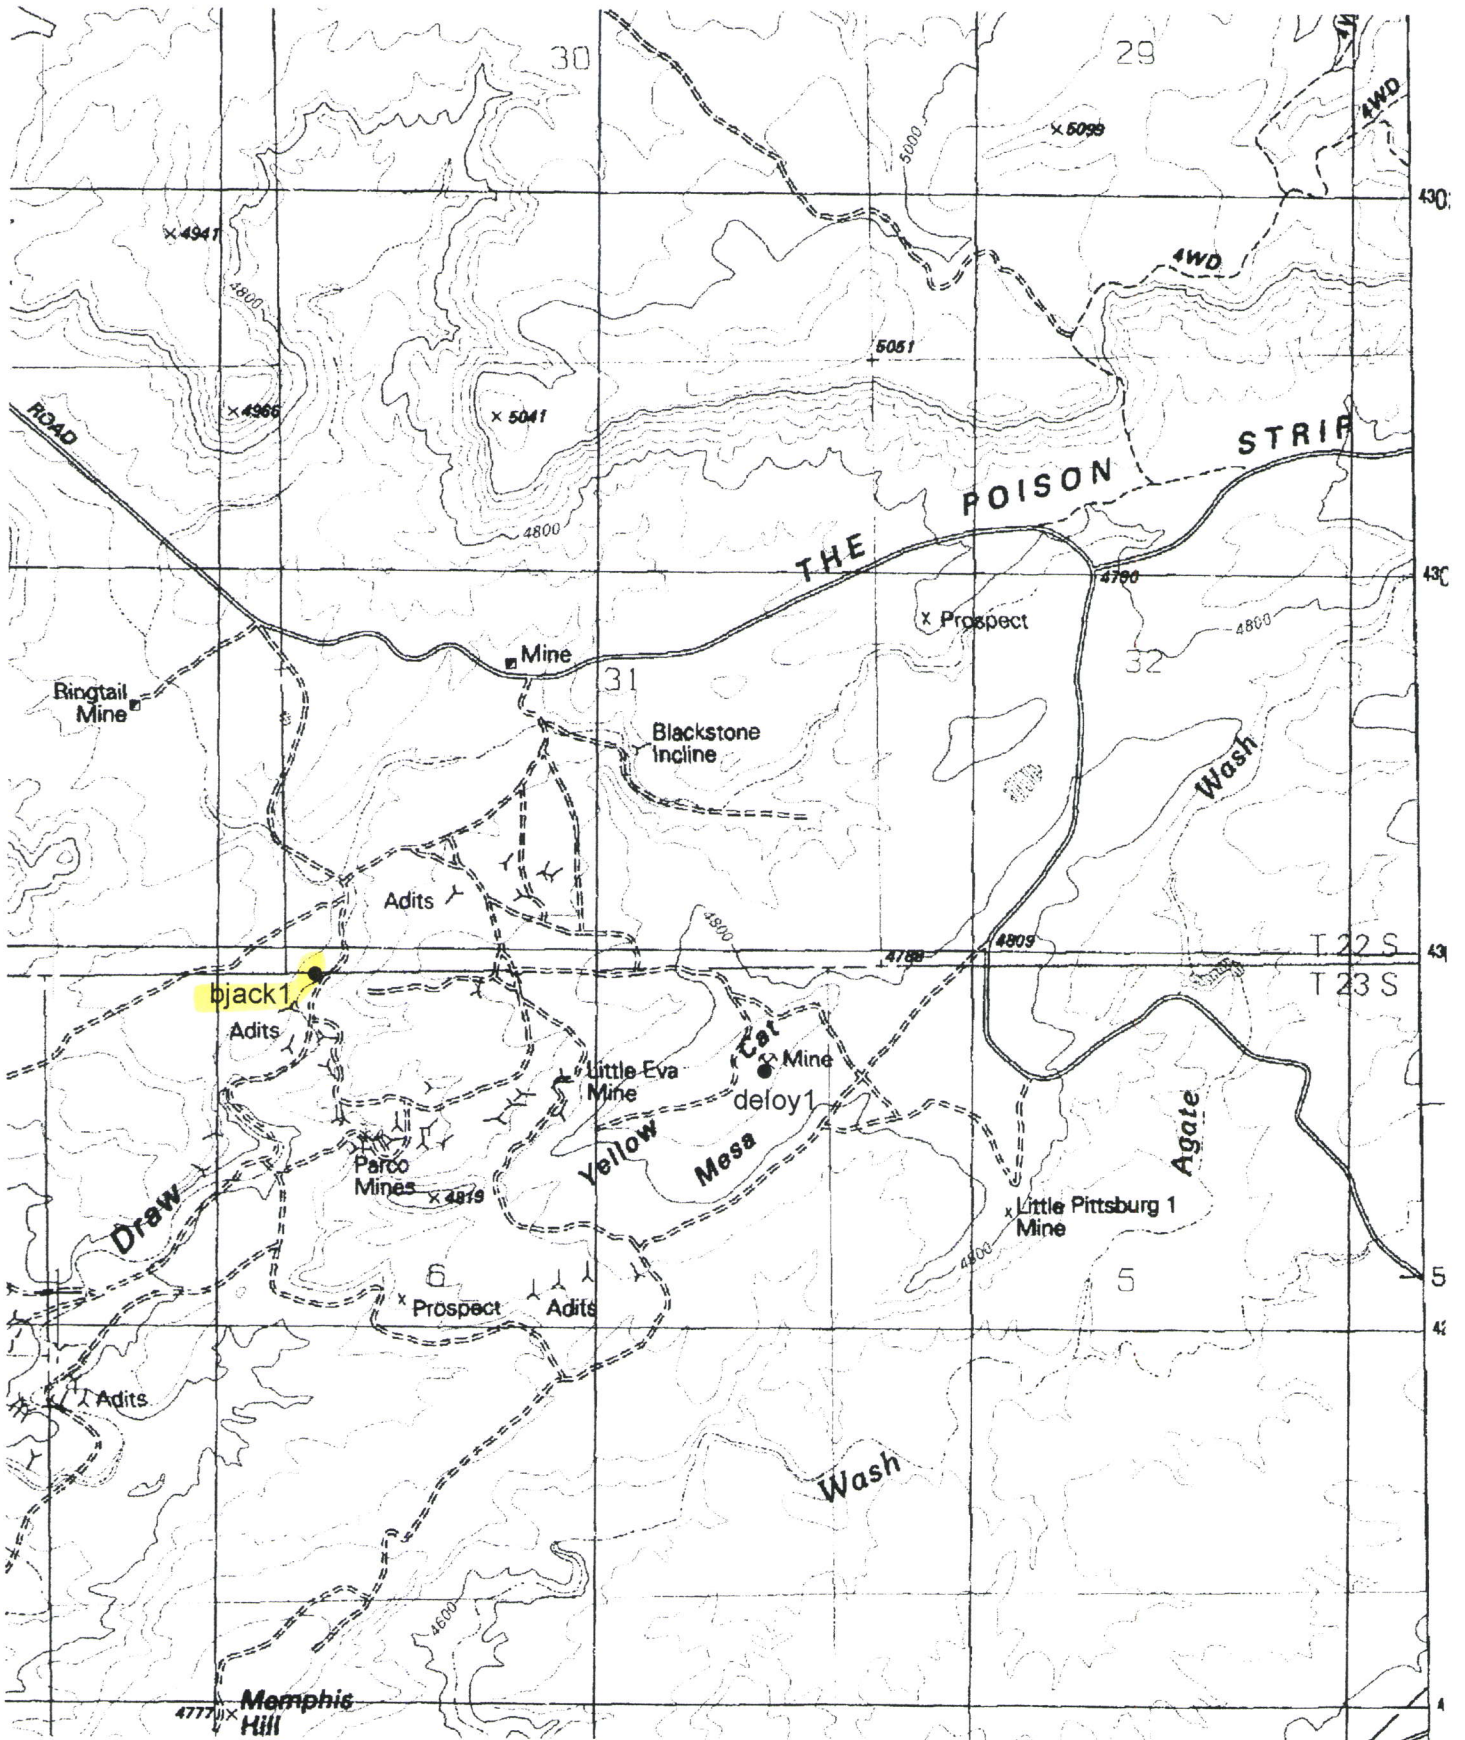

Purpose of Inspection: To examine the site of this proposed project located within an area heavily impacted by previous mining.

The site is accessed by taking exit #190 off Interstate 70 and turning south onto the Yellow Cat Road.

The project site includes an existing trench leading down to an adit. Another smaller adit is located nearby which runs northeast-southwest. There is a small waste pile located on the southwest end of the site. Photographs were taken of the trench and general disturbance in the area. The inspection was cut short due to the increasing rain and water flowing down the drainage and road.

A GPS unit was used to take a location point near the mouth of the trench-adit. The point was named "bjack1" in rover file R102720A. **The corrected UTM coordinates for the point are East 627,263.20155 North 4,299,928.50190.** A photocopy of a portion of the Mollie Hogans quad map is attached showing the location of this point.
